Regarding this planning application this is a green belt site which has animals grazing regularly and has a large selection of wild animals and birds this field supports.

As for the village which is a nightmare to drive with the amount of traffic from cars and lorries from two industry estate . Coming out of star is a problem you have to stop to let lorries out or going in as the road is to small which is a hazard as cars already go to fast on the road this would only cause more traffic problems.

We do not have any doctor or dentist in the village and a very poor bus service to attend appointments you can't get to already .It's not because we didn't have building for them they decided to close both practices.

Think about what is going to happen to all the wild animals trees hedge that you are going to destroy what impact it's going to have on the environment.THIS IS A GREEN FIELD AND SHOULD BE LEFT AS FARM LAND .
