This application has been dealt with in accordance with the Development Control Scheme protocol for small scale proposals.

WSCC in its role as Local Highway Authority has been reconsulted by the Local Planning Authority (LPA) following the applicant's submission of amended plans. The LHA previously provided comment on this application, dated 17/07/2025, raising no highway safety or capacity concerns.

From inspection of the plans, the proposed alterations now only relate to the wall north of the existing access point. The wall south of access point is to remain as existing. As per the LHAs previous comments, the proposals represent an improvement in visibility, and no highway safety concerns would be raised for these proposals.

In summary, the LHA does not consider that this proposal would have an unacceptable impact on highway safety or result in 'severe' cumulative impacts on the operation of the highway network, therefore is not contrary to the National Planning Policy Framework (paragraph 116), and that there are no transport grounds to resist the proposal.
