Subject: RE: DC/25/0721 King George V Recreation Ground Shermanbury Road Partridge Green EH response additional comment

Hi Adrian

Apologies for missing Emma's email

As we discussed I did not consider the potential noise associated with the development to be a material issue. The proposed location of the MUGA is on an established recreation ground that also includes a children's playground, skate park, tennis courts and cricket pitch.

The site of the MUGA is separated from the properties to the west by the existing children's playground and the access road to the car park. Shermanbury Road lies between proposed MUGA and the properties to the north. Due to these separation distances, activities on the MUGA are therefore unlikely to be a source significant adverse noise impacts. As no floodlighting is to be provided, the onset of darkness will naturally limit the use of the MUGA. However use of the MUGA could be further controlled by ensuring the access gates is secured at dusk

Regards

Lee
