Subject: Four Seasons Fuel Billingshurst

Dear Kate,

Following on from my email yesterday, we have checked the application details and would not make any comments as the LPG tanks fall below the lower tier COMAH threshold.

In regard to the particular query from the councillor, the general information is that LPG is rapidly broken down in the environment following its release to air (Liquefied petroleum gas (LPG): general information - GOV.UK). You may wish to consult with your emergency planners regarding any risk assessment.

I hope the above is helpful.

Kind regards,
Anna
