Address: 84 Hurst Road Horsham West Sussex RH12 2DT

Windows

Sash Window to match existing.

Configurations to match as per the plans.

Supplier - Sash Window Repair in Sussex, Surrey & Kent | Sash Window Experts

The inner face of the box is prepared and repainted with a quick drying, low odour primer.

Where necessary, sashes will be planed back to bare timber (tops and faces – not mouldings) and repainted with a quick drying, low odour primer.

The sashes are inspected and any loose joints secured & filled.

Sashes are machined to accept our concealed, discreet weatherseals at the head and meeting rail.

The weighting mechanism is balanced and adjusted, pulley wheels oiled and replacement long lasting cords installed.

When re-hanging, the sashes are resized as required to leave the meeting rails flush.

Replacement parting beads and wooden staff beads with an integral weatherseal are fitted ensuring a low friction, high performance seal.

A standard replacement brass catch and complementing sash lifts.
