Stance:	Customer objects to the Planning Application
Reasons for comment:	- Overdevelopment
Comments:	I am very concerned that about this proposal. I am particularly worried about the risk off flooding. A huge amount of water runs down the land here and the field helps to limit run off onto the village. If this is built on this will increase run off significantly. I am concenred that we are losing yet anothehr field in BG and the impact this has on our wildlfe having to cope with reduced habitat.

I know we have a lot of bats around this area and this will remove a good source of food for them especially if we lose the ancient hedgerow. There is already pressure on our utilities especially water and drainage so how can more people move here without it causing significant strain. The houses at Sumners still haven't sold so why build more here. There are inadequate amenities here to have more families living here. We live here because it is rural we would have moved to a town if we like living with lots of buildings. Barns Green cannot cope with more homes. It would also increase risks in terms of more traffic on rural roads which are not meant to cope with volumes of traffic

Kind regards
