HORSHAM DISTRICT COUNCIL CONSULTATION

TO:	Horsham District Council – Planning Dept
LOCATION:	Horsham Hospital Hurst Road Horsham
DESCRIPTION:	Installation of Air Source Heat Pump units as part of renewal of low temperature hot water district heating network distribution from the main boiler house to parts of the hospital sites
REFERENCE:	DC-24-0604
RECOMMENDATION:	No Objection

SUMMARY OF COMMENTS & RECOMMENDATION:

The site consists of an area of formerly disturbed/developed land immediately abutting the Horsham Park boundary.

There are a number of off-site mature trees and associated understorey providing an effective wooded screen of the site to users of the park.

The trees are principally situated on the Western side of a ditch bank beyond the boundary. They are unlikely to have significant rooting within the area of proposed development.
