To whom it may concern,

I understand that there have been some complications around planning agreements with regards to the [redacted] family current residence and wondered if you may consider some important facts with regards to the children's education.

[redacted] have three children who are currently on role at Fittleworth CE Village School. They joined us in the Autumn Term 2025 and settled very well. [redacted]

All three [redacted] have made friends, settled into the routine of school life, are engaged with their learning and are keen to do well. They all have a brilliant attitude to learning and their attendance has significantly improved, now that they are living permanently in their current home.

The impact of the stability of the school setting and regular attendance has already shown in the progress of all three [redacted] It has also highlighted [redacted] with the youngest [redacted] getting additional support.

I would be very concerned if these children could no longer attend the school or if they were forced to move schools again, as this will have a detrimental effect on their education.

Kindest Regards

[redacted]
