MAIN COMMENTS:

1. Further clarification regarding the methodology of the air pollution study submitted.
2. The site already has an incinerator capable of burning 50kg/h, therefore an Animal carcase incineration LAPPC permit may be required, as the aggregated capacity of the incinerators is over 50kg/h. The application form is available on Animal carcase incineration: process guidance note 5/03. Please indicate if the incinerators are operated separately through an "interlock" which prevents simultaneous use of a single emission point - flue or vent.
