Hi Alice,

A S106 contribution for schemes identified in our Air Quality Annual Statement and Air Quality Action Plan would be preferred, as it could be accessed by WSCC or HDC to partly fund plans mentioned in my previous response.
If that is not possible for the moment, we are happy with the option proposed by the developer - an external quality electric bike charging post & charging point in the bike storage area - provided they set out itemised costing for the proposed measure, with the total estimated value being equal to the total damage costs.

Kind regards
thais
