Dear Dan,

As discussed, I apologise for the confusion but wish to confirm that this Service continues to recommend that a noise survey is undertaken to ensure that there is no adverse impact on local amenity due to the new work activities.

To this end, we recommend the following Conditions in addition to those previously made regarding demolition and/or construction:

1. Noise from the newly permitted use, for the life of the development, shall not exceed background levels as measured at a position closest to the nearest residential dwelling. Daytime and night-time noise measurements to be based on a 1 hour LAeq and a 15 Minute LAeq respectively, in line with BS 4142: 2014 (or subsequent superseding equivalent).

2. Within 3 months of the date of beginning the newly permitted use, a noise assessment shall be submitted which demonstrates working noise levels for daytime operation shall not exceed background levels as measured at a position closest to the nearest residential dwelling. The assessment shall be undertaken in accordance with BS 4142: 2014 (or subsequent superseding equivalent) and current best practice and shall include full spectrum analysis to confirm that there is no tonality or other acoustically distinctive features present in the noise. Any additional steps required to mitigate noise shall be detailed and implemented, as necessary. The post installation noise assessment shall be submitted to and approved in writing by the local planning authority. The details as approved shall thereafter be permanently retained.

Speak soon.
