Comments Details

Commenter Type:	Member of the Public
Stance:	Customer objects to the Planning Application
Reasons for comment:	- Other - Overdevelopment - Privacy Light and Noise
Comments:	The above Company have 1 huge tanker lorry and 2 smaller tanker lorries as well as the storage tanks and gas cylinders etc. The large tanker lorry fills the two smaller and the noise is so loud that we cannot hear each other across the garden. It can also be heard inside our house and we cannot escape. The filling process takes between 1.5-3.5 hours and occurs at least four times per

week. The smell of gas occasionally drifts and gets trapped in our garden and back porch. This added to their onsite smoke is awful pollution which drifts on the south westerly winds over to our houses. The clanking and crashing of gas cylinders is loud and reverberates against the metal structures as they manoeuvre them and load them onto trucks well before 7am and on throughout the day. The forklift trucks bleep most of the day from before 7am. As we are less than 100 metres (75m) from the site and the storage tanks and tankers etc. An increase permitted allowance will increase the disturbance we already suffer. We are also concerned for our safety.

Kind regards
