The Glebe Medical Centre - Horsham District Council application DC/25/0935

Dear Sir/Madam

I object to this application for the following reasons:

It does not resolve the problem of frequent congestion in the short part of The Glebe road up to the car park entrance

No view of the car park is available until cars have already turned into The Glebe and they are then very close to the car park entrance and about to turn into it and so it is too late to ovoid blocking the rood for any car trying to leave the car park so the proposal in the application does not solve the problem

The problem is not visibility as alleged in the application but the fact that the road and the car park entrance are too narrow so vehicles cannot pass each other and the car park is too small to cope with the amount of traffic at busy times so the proposal in the application does not solve the problem

Lowering the wall would greatly damage the current important differentiation between the residential houses and the surgery car park and be highly detrimental to the outlook of the adjacent houses as well as causing damage to the overall look as one approaches The Glebe from Monastery lane so not only does the proposal in the application does not solve the problem but it worsens the outlook of the adjacent houses

The car park is higher than the road, this coupled with a 50% lower wall would mean that car headlights can shine directly into houses so not only does the proposal in the application does not solve the problem but it worsens the situation of the adjacent houses

Yours faithfully

[redacted]

(Owner 3 the Glebe)
