I phoned yesterday to ask about constraints on the builders when this development goes ahead.

I understand that there is a process ongoing to ensure the developers are compliant with your regulations over their vehicles, plant, skips and materials delivery and storage on site .

I just wanted it noted that the residents in Upper Station Road who regularly use this private back lane will not tolerate any restrictions of access for their own vehicles, or for any delivery lorries that also use the lane.

I hope to be able to see any conclusions to that separate situation on the Planning Portal when released.

Thanks
