Categories: Consultations

Dear Jason,

Discharge of condition 24 DC/16/1677

I am satisfied the heritage asset management plan is comprehensive and proportionate. I accept the difficulty in any direct enhancement as it is not in the ownership of the developer. However, the condition asks for details of proposed measures for interpretation of the monument. The management plan recommends an information board should be placed at the boundary between the development and the adjacent land containing the monument but it does not contain a timetable for the implementation of these measures. We should ask for a timetable and treat this in a similar way as with Chennells Brook s.a.m. I am happy to speak with them directly.

Regards,
Seán
