Compatible Accessoiries

Destoner

Reduce the risk of foreign objects in your coffee and avoid damage to your equipment.

Green Coffee Conveyor

The Green Coffee Conveyor transports your green coffee automatically into the hopper.

SFE Filter

To reduce emission, operating costs and roast eco-friendly with the W6 Series, we offer a SFE filter in the table to reduce smoke and fine dust.

Catalytic Emission Cleaner

External Cyclone

A cyclone collects the chaff that comes from the roasted beans.

A catalytic afterburner works almost the same as a thermal afterburner but uses lower temperatures.

Giesen and the environment

Quality materials

We do not only think green, but also act like it. This reflects in all our products. Since the beginning, sustainability has been one of our high priorities. We source our materials close to home to minimize the transportation impact. For example, our cast iron front plates are crafted in the Netherlands, near to our manufacturing. Besides that, we offer not only gas roasters, but also electric ones. This way, we give our customers every opportunity to maximize their green footprint.

Dureable choice

We do not believe in quantity. We believe in high-quality materials that last for years. Our quality control is extensive and of a high standard. Only the best is good enough for our coffee roasters. This increases the lifespan of our coffee roasters significantly and takes sustainability to the next level.

Extra options

- Giesen Profiler
- Laptop holder
- Cropster connection
- Custom company logo
- Additional sensors
- Remote Support Router
- Base Plate
- Transport Trolley

Transport options

- Ex. Works
- Road transport
- Air freight
- Boat transport

Installation

Installation is always performed by Giesen-certified mechanics. Although Giesen Coffee Roasters is becoming a well-known brand, our way of working remained the same; informal and with a personal approach. We combine Dutch craftsmanship with family values and a no- nonsense mentality. We treat every customer, small or large, in the same professional way.

Lets find a roaster that meets your needs

ROASTER NAME	TYPE OF ROASTER	HEATING TYPE	BATCHSIZE (KG)	CAPACITY (KG/H)
Sample Roaster	Automatic	Gas or electric	0,2	0,8
