Planning Statement – Bicycle rack, Dousters, DC/21/1073

Re Discharge of Condition No. 5 in Planning Permission granted 19-10-22.

My name is Rob Stanway, owner of Dousters. This Planning Statement is in support of the above. A bicycle rack has been positioned in the garden shed, some 10-15m SW of the house, in the back garden. The purpose is to enable tenants to readily use cycles instead of cars, for local shopping, etc, which in turn is in support of the green economy and in reducing global warming. This green measure is in addition to 100% LED lighting, and 16 solar panels to contribute towards carbon free electricity for the house, plus rain water harvesting which supplies all water for toilet flushing and garden use, instead of using mains water, which incurs CO2e emissions in its production.

I hope this explains. [redacted]

Regards

Rob Stanway.
