Recommendation of work for St Mary's Church:

T1 Ash: To lift lower limbs away from the roof of adjacent building, also to lift the lower limbs away from the memorial stones.

T2 Yew: To prune back several lower Limbs away from the path to the church.

T3 Yew: To remove unsightly storm damaged limbs.

T4 Silver Birches: To cut the Ivy around the base of the trees and to raise the canopy over the graveyard.

T5 Maple, T6 Lime, T7 Red Oak & T8 Maple: To raise the canopy above both the footpath side and graveyard. Check for and remove obvious dead wood.

To chip and remove all green waste.

I will forward photos and sketch plan. As the site is located in a conservation area, Horsham District Council will need to be advised of the proposed works a couple of months before work can commence.

For my company to carry out the work above it would be £900 including waste removal.

Kind Regards

David Grady
