ERECTION OF SINGLE STOREY REAR EXTENSION

Additional comments

My kitchen door faces north, directly onto the planned site for the
SUN ROOM (mark alford design). The two windows facing me would be hard to ignore when the sun was shining.

The path leading directly along from the sun room to the front gate also concerns me about how this extension will be used.

Noise and lack of privacy have not been an issue over the 23 years in my home. I hope it will continue for me and whoever comes here next.
