Water Treatment
Ioniser, sand filter, and chlorine with pH correction addition.
The objective is to provide the bather with water containing an absolute minimum level of chlorine, 60-80% less chlorine than a non-ionised pool.

Pool Filtration 1no. 20-inch diameter, Sand Filter.
.

Manufacturing features
Discharge connection type: Thread
Discharge diameter: 1 1/2" (FKP 760 2")
Suction connection type: Thread
Suction diameter: 1 1/2" (FKP 760 2")

Filter materials:
Polypropylene moulded with the two halves thermally welded
O-rings: NBR/EPDM

Puronizer for Pools up to 90m3 (20,000g)

Manufactured in Britain, the Puronizer is a tried and tested product which uses charged ions to kill bacteria and algae. A simple to use method of ensuring quality water with very little effort.

Chlorine consumption is reduced by as much as 800%, making it particularly ideal for those sensitive to chlorine, e.g. asthmatics

Less maintenance, meaning fewer backwashes and low running costs
