By email only

Thank you for requesting advice on this application from Place Services' ecological advice service. This service provides advice to planning officers to inform Horsham District Council planning decisions with regard to potential ecological impacts from development. Any additional information, queries or comments on this advice that the applicant or other interested parties may have, must be directed to the Planning Officer who will seek further advice from us where appropriate and necessary.

Application: **DC/24/1534**
Location: **Huddlestone Farm Horsham Road Steyning West Sussex BN44 3AD**
Proposal: **Creation of an access track.**

Dear Shazia

Thank you for re-consulting Place Services on the above application.

a) No ecological harm/No objection	
b) Requires further information on protected species	
c) Recommend grant permission subject to conditions	Yes
d) Recommend refusal	
e) Subject to Natural England's formal comments on the conclusion of the Water Neutrality Appropriate Assessment	Yes
f) Discharge of condition	

Please note that following receipt of Natural England's position statement on developments in the Sussex North Water Supply Zone, decisions on planning applications should await the completion of a Sussex North water neutrality strategy.

Summary

We have reviewed the Precautionary Method Statement for Amphibians and Reptiles (The Ecology Co-op, December 2024), Biodiversity and Ecology Management Plan (The Ecology Co-op, December 2024) and Preliminary Ecological Appraisal (The Ecology Co-op, July 2024) supplied by the applicant, relating to the likely impacts of development on designated sites, protected and Priority species & habitats, and

identification of appropriate mitigation measures. Please note that comments on Biodiversity Net Gain are provided by Horsham District Council in-house.

We note from the Preliminary Ecological Appraisal (The Ecology Co-op, July 2024) that there are no buildings on site and that all trees will be retained. We therefore agree that no further surveys for bats are required.

As there is suitable habitat for reptiles on site, including grass verges, hedgerow and woodland edge, we support the implementation of the Precautionary Method Statement for Amphibians and Reptiles (The Ecology Co-op, December 2024), which should be secured by a condition of any consent.

We are now satisfied that there is sufficient ecological information available to support determination of this application. However, please note we have no comments on Great Crested Newt as we have been instructed to leave comments on this European Protected Species to the NatureSpace Partnership.

This provides certainty for the LPA of the likely impacts on designated sites, protected and Priority species & habitats and, with appropriate mitigation measures secured, the development can be made acceptable.

The mitigation measures identified in the Precautionary Method Statement for Amphibians and Reptiles (The Ecology Co-op, December 2024), Biodiversity and Ecology Management Plan (The Ecology Co-op, December 2024) and Preliminary Ecological Appraisal (The Ecology Co-op, July 2024) should be secured by a condition of any consent and implemented in full. This is necessary to conserve and enhance protected and Priority species particularly those recorded in the locality.

We also support the proposed reasonable biodiversity enhancements for protected, Priority and threatened species, which have been recommended to secure net gains for biodiversity, as outlined under Paragraph 187d and 193d of the National Planning Policy Framework (December 2024). The reasonable biodiversity enhancement measures should be outlined within a separate Biodiversity Enhancement Layout and should be secured by a condition of any consent. The Biodiversity and Ecology Management Plan (The Ecology Co-op, December 2024) provides specifications for the enhancements and we therefore recommend that a plan of the enhancement locations should be submitted to the LPA.

This will enable LPA to demonstrate its compliance with its statutory duties including its biodiversity duty under s40 NERC Act 2006 (as amended) and delivery of mandatory Biodiversity Net Gain.

Impacts will be minimised such that the proposal is acceptable, subject to the conditions below based on BS42020:2013. We recommend that submission for approval and implementation of the details below should be a condition of any planning consent.

Recommended conditions

1. **ACTION REQUIRED IN ACCORDANCE WITH ECOLOGICAL APPRAISAL RECOMMENDATIONS**
   "All mitigation and enhancement measures and/or works shall be carried out in accordance with the details contained in the Precautionary Method Statement for Amphibians and Reptiles (The Ecology Co-op, December 2024), Biodiversity and Ecology Management Plan (The Ecology Co-op,

December 2024) and Preliminary Ecological Appraisal (The Ecology Co-op, July 2024) as already submitted with the planning application and agreed in principle with the local planning authority prior to determination.

This will include the appointment of an appropriately competent person e.g. an ecological clerk of works (ECoW) to provide on-site ecological expertise during construction. The appointed person shall undertake all activities, and works shall be carried out, in accordance with the approved details."

Reason*:* To conserve and enhance protected and Priority species and allow the LPA to discharge its duties under the Conservation of Habitats and Species Regulations 2017 (as amended), the Wildlife & Countryside Act 1981 as amended and s40 of the NERC Act 2006 (as amended) and Policy 31 of the Horsham Development Framework.

2. **PRIOR TO ANY WORKS ABOVE SLAB LEVEL: BIODIVERSITY ENHANCEMENT LAYOUT**
"A Biodiversity Enhancement Layout for biodiversity enhancements listed in the Biodiversity and Ecology Management Plan (The Ecology Co-op, December 2024) shall be submitted to and approved in writing by the local planning authority.

The content of the Biodiversity Enhancement Layout shall include the following:
   a) detailed designs or product descriptions for biodiversity enhancements; and
   b) locations, orientations and heights for biodiversity enhancements on appropriate drawings.

The enhancement measures shall be implemented in accordance with the approved details prior to occupation and all features shall be retained in that manner thereafter."

Reason: To enhance protected and Priority species & habitats and allow the LPA to discharge its duties under paragraph 187d of the NPPF 2024 and s40 of the NERC Act 2006 (as amended).

Please contact us with any queries.

Yours sincerely
