Unit 1 Old Mill Square, Storrington, Pulborough RH20 4NQ

Application Reference: DC/24/1265

Waste Management Plan

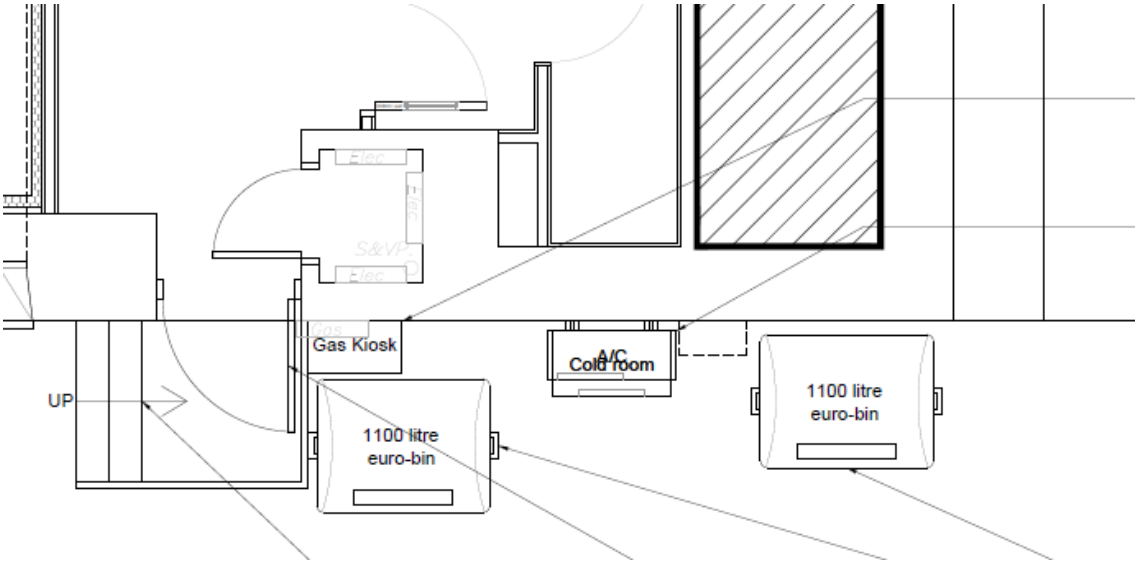
This Waste Management Plan has been prepared in support of a planning application for the following development at the above address:

> *"Change of use from vacant bank (Class E) to hot food takeaway (sui generis). Installation of extract and ventilation equipment, replacement shopfront and other minor external alterations."*

This document sets out the measures that will be put in place for the future use to ensure that the storage and collection of waste can be suitably controlled by condition.

Refuse

All waste will be bagged and taken to the rear of the site where there will be two 1100l commercial bins. An extract from the Block Plan shows the location of the bin store.



One bin will be used for general waste, and one for mixed recyclables. Bins will be collected from within the service yard, and it is expected that they will be collected once a week or as required. Collections will be programmed to take place in the morning, outside of peak traffic hours.

December 2024

Litter

A waste bin will be provided within the customer waiting area for the disposal of litter by customers.

Every day, staff will inspect the area immediately around the store for litter during the store's operation and a final check will be made as part of the closing procedure. Any litter found will be collected and disposed of with the takeaway's refuse.

The pizza operation does not create a significant amount of litter with the pizzas being delivered or collected by customers for consumption at home and not on the street outside the premises and therefore there is not expected to be an increase in litter at or around the site.
