Subject: Extension to DC/25/1120

Categories: Comments Received

Dear Tamara,

[REDACTED] we own Pucks Croft next to Pucks Croft Cottage.

We are very concerned about the impact this development will have on the environment, not least our trees, many of which are veteran Oaks and pines which are very close to the border of the proposed development. We would like to get a tree specialist to help understand the implications to support our submission as it is summer (and there don't seem to be many tree experts available) we wanted to formally request an extension for submission of comments to the end of September 2025. As there have been no planning notices put up in the area yet (and many of our neighbours who wanted to comment were unaware) I'm hoping that is ok.

Many thanks,
