Commenter Type:	Neighbour
Stance:	Customer objects to the Planning Application
Reasons for comment:	- Privacy Light and Noise
Comments:	To let you know that our land is much lower than No 3 next door's land. We have recently install to replace old lower dilapidated fence with new higher fence which is 7 feet higher (measured from our lower land) for more privacy due to the no 3 property's existing conservatory as it was built higher on their ground level. However, We have looked at the photos as it was taken from the higher level ground and we released it can be overlook into our property which is our patio within the back garden although we need privacy within the whole garden including the patio. When we look at the proposed plans of the new extension, showing the new kitchen window that facing our new fence (this part of fence is situated at the side of our patio) We assume The window, the top half of that window is visible from our patio area that we shall have no privacy at all. Would you please omitted that window to be installed to gain our privacy. Or the window can be moved adjacent to the new side door away from the back line of the

rear elevation of existing of no 3 property within our no 1 property in line to create privacy for us.

Thank you
