Address:	1 The Glebe Storrington

Comments Details

Commenter Type:	Neighbour
Stance:	Customer objects to the Planning Application
Reasons for comment:	- Design - Highway Access and Parking - Loss of General Amenity - Privacy Light and Noise
Comments:	We note the application has changed. Alterations proposed now alter only one side of the wall - to the left of the entrance into the car park. However, our objections, as stated to the previous application, still remain unchanged. We strongly object as lowering any part of the car park wall does not improve the visibility into the car park of any driver once they have turned off Monastery Lane into The Glebe road. Once they have turned into The Glebe it is too late to

avoid meeting any cars coming out of the car park. Cars leaving the car park can already see cars on The Glebe road but until they meet they do not realise that they can't pass easily. The cars coming in are usually on the wrong side of the road as they sweep in off monastery lane. This doesn't help. The road simply isn't wide enough. It wasn't originally designed to take this traffic as the original plan was for traffic to enter the car park direct from Monastery Lane and not via The Glebe.
As previously stated it is not visibility that is the issue here. The wrong problem is being addressed. The issue is the narrowness of The Glebe road.
Our objections remain unchanged as do those of all our neighbours at The Glebe.
Its disappointing, yet again, that the applicant has not made any attempt to speak with the people most affected by this proposal, The Glebe residents.

Kind regards
