[redacted]

Thank you for the email and apologies, I was under the impression (from the planning portal information) that a reason for carrying out tree works within a CA where no TPO is in place was not required for an S211?

However, for clarity, the reasons are that it is a large tree species that is too close to the building, is becoming too large with little scope for effective pruning due to its species. Therefore, the client would like to re-landscape that area of the garden.

I hope this suffices.

Kind regards

James Cox
