Comments Details

Commenter Type:	Member of the Public
Stance:	Customer made comments in support of the Planning Application
Reasons for comment:	- Design - Highway Access and Parking
Comments:	The wall is an improvement to the appearance of the boundary between the two properties, the one at 18 Greenfields Way and the one at 1 Amberley Road. The height of the wall is not intrusive. It is actually 1 meter high, which is much lower than constructions with fences and hedges that are much higher. Even in the front garden of 1 Amberley Road there are enclosures of fence panels to the height of more than 1.6 metres and an enclosed car port as an extension to a heavily extended garage. The height of this construction is more than 2 meters.

The wall offers protection of the property at 18 Greenfields Way from the encroaching neighbours next door who for years have spread their unwanted items onto the garden of 18 Greenfields Way.
The bricks used for the construction of the wall are identical in appearance, size and colour, to the ones used for the Garage at 1 Amberley Road.

Kind regards
