Dear Sir,

I'm a original resident of this housing estate built by Croudace starting approx years 1978

The red line that represents 18 Stoneybrook boundary shown on planing request is incorrect. The end of garden is angled not rectangular with a 6' high brick wall running to near public footpath. This angled area is what I'm most concerned about. I wish for that to remain grassed & part of the estate open space continuing to be sympathic with the original architects vision.

If this triangular area is taken away to giving a larger garden to house 18 this will restrict my day light coming into the living room window. The view will be a surround of 6' high wooden fencing especially as house 17 opposite has a 6' high wooden fence.

Yours
