Date: 5/09/24
Site visit carried out by: Ben Aldrich.
Owner: Mrs Carol Howard
Site address :
16 Hern brook Drive,
Horsham,

Western red cedar tree located on the west side of the rear garden at 16 Hernbrook drive. The tree is in close proximity of a yew and another Western red cedar, this is causing the area to become very congested meaning all three trees are in competion not allowing any one tree to become a specimen tree. This is also making the area very dark, restricting light.

I therefor suggest removing the Western red cedar tree in question improving the spacing between trees and allowing the neighbouring Yew tree to flourish.

Kind regards,
Ben.
