Please find the attached plan of the site with trees marked as follows:
-T1 Multi-stemmed Birch (adjacent to drive), reduce entire crown to shape by 2.5m. Crown thin by 10%. Remove all substantial deadwood.
-T2 2x Conifer (near drive-way entrance), trim to shape.
-T3 Conifer (neighbouring tree), trim face to shape.
-T4 2x Pittosporum, trim/prune to shape.
-T5 2x Laurel, trim/prune to shape.
-T6 1x Cotoneaster, reduce to shape by up to 1m.
-T7 1x Pittosporum (adjacent to Cotoneaster LHS), reduce to shape by 1-1.5m.
-T8 1x Conifer, reduce height by 3.5-4m and trim face where necessary.
-T9 Pittosporum (in between Conifers), reduce height to level by 3m and trim face.
-T10 1x Conifer (LHS of Pittosporum hedge row), reduce height by 2m.
-T11 2x Conifer (either side of Oak), controlled sectional dismantle to ground level and grind stumps.
-T12 1x Swamp Cypress, crown lift to give a height clearance of 3m from ground level (3-4 limbs).
-T13 Ornamental Hawthorn/Privet/Juniper/Bay/Ivy, fell and grind stumps.
-T14 2x Conifer, controlled sectional dismantle to ground level and grind stumps.
-T15 1x Conifer, reduce entire crown to shape, reducing height by 3m and lateral growth by up to 1-1.5m, trimming lower growth only.

- 1x Multi-stemmed Birch (adjacent to drive), reduce entire crown to shape by 2.5m. Crown thin by 10%. Remove all substantial deadwood.
Height: 9m
N: 5m
E: 6m
S: 4m
W: 5m

- 2x Conifer (near drive-way entrance), trim to shape.
Height: 4.5m
Spread: 2m

- Conifer (neighbouring tree), trim face to shape.
Height: 6m
Spread: 5m

- 2x Pittosporum, trim/prune to shape.
Height: 4m
Spread: 3m

- 2x Laurel, trim/prune to shape. (Rear garden)
Height: 3m
Spread: 3m

- 1x Cotoneaster, reduce to shape by up to 1m.
Height: 3.5m
Spread: 4m

- 1x Pittosporum (adjacent to Cotoneaster LHS), reduce to shape by 1-1.5m.
Height: 3m
Spread: 3m

- 1x Conifer, reduce height by 3.5-4m and trim face where necessary.
Height: 10m
Spread: 4m

- Pittosporum (in between Conifers), reduce height to level by 3m and trim face.
Height: 6m
Spread: 4m

- 1x Conifer (LHS of Pittosporum hedge row), reduce height by 2m.
Height: 8m
Spread: 4m

- 2x Conifer (either side of Oak), controlled sectional dismantle to ground level and grind stumps.
Height: 10m
Spread: 4m

- 1x Swamp Cypress, crown lift to give a height clearance of 3m from ground level (3-4 limbs).
Height: 12m
Spread: 6m

- Ornamental Hawthorn/Privet/Juniper/Bay/Ivy, fell and grind stumps.
Height: 1-2m

- 2x Conifer, controlled sectional dismantle to ground level and grind stumps.
Height: 10-12m
Spread: 6-7m

- 1x Conifer, reduce entire crown to shape, reducing height by 3m and lateral growth by up to 1-1.5m, trimming lower growth only.
Height: 12m
Spread: 8m

Reasons:
All pruning works are in line with good tree management practices. Fells are required to make room for higher amenity valued trees (Oaks).
