

*Fig 1 View towards the South (Site of proposed garage using roof for solar PV Panels)*

*Fig 2 The garage will create rural courtyard ambience to the entrance. It will provide secure parking (with electric charging) and space for a home office/gym to have an aspect to the garden and view to the south side of the house.*

*Fig 3 Existing integral garage is being converted (as previously approved) hence the plan for garage outbuilding with facilities incidental to the enjoyment of the house.*

*Fig 4 Front elevation of house*
