Comments:	Further to my previous comments a new issue has arisen... I would like reassurance that the proposed septic tank of this development will be of adequate size for projected use and that it will be regularly inspected and cleaned. My pond is below the Furnace Pond by a significant amount and any leakage from the septic facility could severely impact the wildlife and fish in my pond. Any overflow could not be easily corrected and I would like very much to be reassured on this point.

Kind regards
