I object to the proposal to build 3000 to 10000 houses on ancient woodland and meadow land destroying an area that has been largely untouched since the stone age. The forthcoming changes to Gatwick airport will mean that the people living in the proposed properties will have hundreds of flights overhead daily causing noise pollution and air pollution. which will endanger the health of the occupants. The local area is already lacking sufficient facilities such as medical and educational capacity. This plan is ill thought out with future occupants in mind. . Promises of extra surgery's and schools are nice to but rarely fulfilled in practice, Building on brown field sites should be a priority in all local planning
