1. INTRODUCTION

This Heritage Statement has been prepared by LOM on behalf of Santander in support of Listed Building Consent (LBC) and Advertisement Consent applications for internal works to a Santander branch.

This document should be read in conjunction with the architectural drawings and documents submitted as supporting material.

Separate planning applications (planning references: DC/25/0668 and DC/25/0669) were submitted for external works to replace the fascia and projecting hanging signages. Consent was granted for these applications on 18th June 2025.

2. DESCRIPTION OF SITE

The site (Santander, 1 South Street, Horsham, RH12 1EL) is a Grade II Listed Building in Horsham town centre.

3. ASSESSMENT

The building itself is located within the Horsham Conservation Area. Historic England (List Entry Number 1027487) describes the building as follows:

> *"A large warehouse with shops under, occupying a site on the corner of South Street and Middle Street. Mid C19. 3 storeys. Painted brick, stuccoed on ground-floor. Half-hipped slate roof with iron decorative railing on top, enclosing an octagonal lantern with oversailing eaves supported by small brackets. Spike on top. The main eaves oversail with a moulded cornice supported on curved brackets. 1 window facing west and 1 facing north. Both fronts also have 1 blocked window-space towards the north west corner of the building. All windows have segmental heads, those on north face being triplets. All sashes, glazing bars intact. Circular moulded braces on west side. In the centre of the west front are double loading-doors of 4 panels each, on second floor, with a hinged pulley on a decorative bracket to the left. Directly below are similar double doors with upper 2 panels removed for glazing. Both sets of doors have hinged ramps which are folded over the bottoms of the doors. Heavily moulded cornice above ground-floor, supported on pilasters whose bases merge with the plinth of the building. The ground-floor is curved to take the corner into Middle Street and a moulded ogee-shape occurs above the cornice. Original shop-fronts, the north one projecting, remain on both sides of the building. Recessed double doors in north front with upper parts removed for glazing."*

There are many listed buildings spread around the conservation area, with most concentrated along Causeway between St Mary's Church and South Street.

continued

4. PROPOSAL

The proposal comprises of internal refurbishment works are mainly the updating of internal shop fitting items with up-to-date modern shop fittings typical of a Santander branch refurbishment. The proposed ground and first floor layouts include alterations to the banking halls, customer rooms and counter/admin areas. There are elements that are applicable to special care and detail within the building. The methodology for these works has been highlighted and addressed in the scope of works shown on the architectural drawings submitted with the planning application.

The rationale behind the proposed works is explained in more detail in the Design and Access Statement submitted with the LBC application.

5. IMPACT

The proposed works covered by this planning application are all internal works. Therefore, the visual impact on the property and surrounding area will be minimal and will not significantly change the building's appearance due to the small-scale and discreet nature of the works. The colour scheme has been thought about and is sympathetic to the building itself, surrounding buildings and the area.

Being a Grade II listed building within a conservation area, the proposed works are an opportunity to restore and protect the building for further years.
