

The historical maps shown were reproduced from maps predominantly held at the scale applied for England, Wales and Scotland in the 1840 s. In 1854 the 1:2,500 scale was adopted for mapping urban areas, these maps were then used to update the 1:10,560 maps. The published date given therefore is often some years after the survey date. Before 1907, all OS maps were produced by the Ordnance Survey, after 1907 they were produced by a number of different organisations, giving rise to significant features in outlying areas. In the late 1940's a Provisional Edition was produced, which updated the 1:10,560 mapping from a number of sources. The maps appear unfinished - with all military camps and other strategic sites removed. These maps were initially overlaid with the National Grid. In 1970, the first 1:10,000 maps were produced using the Transverse Mercator Projection. The revision process continued until recently, with new editions appearing every 10 years or so for urban areas.

The Historical Aerial Photos were produced by the Ordnance Survey at a scale of 1:1,250 and 1:10,560 from Air Force photography. They were produced between 1944 and 1951 as an interim measure, pending preparation of conventional mapping due to post war resource shortages. The photos were taken in 1947 and 1948. The original editions were withdrawn and only later made available after a period of fifty years although due to the accuracy of the editing, without viewing both revisions it is not easy to spot the edits. Where available Landmark have included both revisions.

The historical maps shown were reproduced from maps predominantly held at the scale adopted for England, Wales and Scotland in the 1840 s. In 1854 the 1:2,500 scale was adopted for mapping urban areas, these maps were used to update the 1:10,560 maps. The published date given therefore is often some years from the date of the survey. Before 1900, all OS maps were produced on a rectangular grid. In the late 1940s, the OS maps were converted to a circular grid. This conversion was done to allow for the circular nature of the country's coastline. In the late 1940s, the OS maps were converted to a circular grid. This conversion was done to allow for the circular nature of the country's coastline. In the late 1940s, the OS maps were converted to a circular grid. This conversion was done to allow for the circular nature of the country's coastline.

Ordinance Survey Plan

Published 1973 - 1974

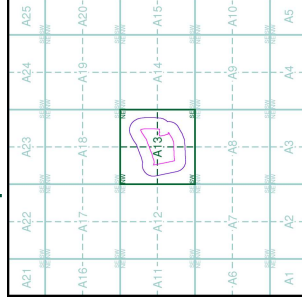

Source map scale - 1:10,000

The historical maps shown were reproduced from maps predominantly held at the scale adopted for England, Wales and Scotland in the 1840 s. In 1864 the 1:2,500 scale was adopted for mapping urban areas, these maps were used to update the 1:10,000 maps. The published date given therefore is often some years later than the surveyed date. Before 1900, all OS maps were produced on Cassini Projection and the Ordnance Survey was a combination of counties, giving rise to significant features in outlying areas. In the late 1940's a Provisional Edition was produced, which updated the 1:10,000 mapping from a number of sources. The maps appear unfinished - with all military camps and other strategic sites removed. These maps were initially overprinted with the National Grid. In 1970, the first 1:10,000 maps were produced using the Transverse Mercator Projection. The revision process continued until recently, with new editions appearing every 10 years or so for urban areas.
