Source map scale - 1:10,000

The historical maps shown were produced from the Ordnance Survey's 1:10,000 colour raster mapping. These maps are derived from Landplan which replaced the old 1:10,000 maps originally published in 1970. The data is highly detailed showing buildings, fences and field boundaries as well as all roads, tracks and paths. It also includes the names of all the buildings, roads, rivers, streams, and ponds. The data is derived from the Ordnance Survey's 1:10,000 colour raster mapping. The data is derived from the Ordnance Survey's 1:10,000 colour raster mapping. The data is derived from the Ordnance Survey's 1:10,000 colour raster mapping.

Source map scale - 1:10,000

VectorMap Local (Raster) is Ordnance Survey's highest detailed 'backdrop' mapping product. These maps are produced from OS's VectorMap Local, a single vector dataset at a nominal scale of 1:10,000, covering the whole of Great Britain, that has been designed for creating graphical mapping. OS VectorMap Local is derived from large scale aerial photography at 1:250 scale (covering major urban areas) and 1:250 scale (smaller urban areas, villages and developed areas), and 1:10,000 scale (mountain, moorland and river estuary areas).

The historical maps shown were reproduced from maps predominantly held at the scale adopted for England, Wales and Scotland in the 1840 s. In 1864 the 1:2,500 scale was adopted for mapping urban areas and by 1896 it covered the whole of what were considered to be the cultivated parts of Great Britain. The published Ordnance Survey map is often some years later than the original. Before 1938 the OS map was based on the Cassini Projection, with independent surveys of a single county or group of counties, giving rise to significant inaccuracies in outlying areas.
