Subject: DC/24/1018

Dear Hannah,

We have made an assessment of the further details provided by Ben Kirk of Promethean Planning and subject to some minor changes, this will be sufficient for the Rainwater Harvesting Management plan to meet our requirements. We can ask for these additional details and changes via a Pre-commencement Condition.

Suggested condition to control use of the RWH Management Plan:
Additional details with regard to test results being provided to the LPA and clarification of the use of tanks are required for the Rainwater Harvesting Management Plan dated 09.09.24, and subject to these being provided, a condition requiring the implementation of the RWHMP will satisfy the requirements of this department.

Kind regards
Penny
