Comments Details

Commenter Type:	Neighbour
Stance:	Customer objects to the Planning Application
Reasons for comment:	<ul style="list-style-type: none">- Highway Access and Parking- Trees and Landscaping
Comments:	There will be increased traffic to and from Warnham with this development completed. Together with the through traffic which is already causing issues with speeding and rush hour traffic, I do not think the current road structure and width of roads is suitable for such an increase in traffic levels. The village already needs traffic calming measures which has been refused by the local authority. Additionally, by building on this land, I believe that Warnham will see an increase in flood risk as the area at the junction of Friday street already floods significantly during the

winter. What thought has gone into the widening of roads and drainage. If the roads are widened, what affect will this have on the sentient oaks that line the route?? Totally against this development

Kind regards
