Dear Householder

Re: 1 Ash Cottages, East Street - Overgrown Vegetation

During a recent inspection, it was noted that the vegetation on your property obstructs the pavement on Horsham Road.

As it is reducing the width of the pavement we would therefore be grateful if you would take prompt action to cut the overgrowth to your boundary.

It is the responsibility of the owners/occupiers to prevent their vegetation from interfering with the use of the highway and as part of its duties, the County Council carries out regular highway inspections to ensure these problems do not occur. Overhanging vegetation can cause a problem for pedestrians, particularly those who are blind or partially sighted or who have mobility problems and low vegetation overhanging the highway may be at face/eye level for the very young.

We do ask that you therefore please arrange for the vegetation to be cut back, within the next 14 days from the date of this letter, so that no part of it overhangs the pavement.

Should you wish to discuss this any further, please feel free to contact us quoting the reference number above, we appreciate your co-operation with this matter.

Yours faithfully
