RE: DC/25/0784- Surgery to 1x Chestnut and 2x Beech ,No3 Beedingwood Drive Colgate West Sussex RH12 4TE

Dear Catherine,

I have attached some photos of the three trees and with the help of the computer drawn a line showing the approximate cut line on all three trees.
The amount to be removed will be about 2 -2.5m of the overall crown of the tree, however until the climber is in the canopy it is hard to give an exact measurement as to follow good arboriculture practise and cutting to set measurements is not possible.
I hope that Andrew Bush will be able to clearly see the proposal from the photos and his site visit.
The trees are getting very tall and blocking light from No.4 Beedingwood Drive as well as No.3 and the purpose is to reduce the canopy of all three trees, allow light under the canopy of the one sided Chestnut and reducing the shadow from the height of the canopies.
You will note that I have drawn three crosses on T1 to indicate the three limbs to be removed, however a site inspection is needed to understand the proposal as the full leaf canopy hides the shape.

I hope this will allow the application to be validated.

Yours sincerely

Gary Collier
