To who it may concern

I moved into the barn [redacted] nearly 9 years ago !

I have a small grounds maintenance and landscaping business I use the barn to store my machinery . All our green waste is recycled at Olus environmental .

I employ young men from the village most of who have struggled at school and home and do my best to help them .
We maintain the track and the hedges and have a good repore with walkers who stop for a chat and actually the barn is now known in the village as the flint barn .

Yours sincerely
