Hi Sophie

Thanks for the consultation request.

I have reviewed the Noise Management Plan Revision E.

I note the public address system is not to be used for playing amplified music. Accordingly I consider the use of the PA system is unlikely to result in significant adverse noise impacts to the nearest noise sensitive receptors. In accordance with the guidance given in the Noise Policy Statement for England, noise that can be heard and cause small changes in behaviour or attitude should be mitigated and reduced to a minimum so as to minimise adverse effects on health and quality of life. The noise management plan provides an appropriate management framework to achieve this by keeping use of the PA system to the minimum necessary for the events.

Regards

Lee
