I note the various documents which have been registered against planning application DC/26/1335 I note that no reference has been made to the issues raised in section 7 of my letter of objection.

The site is outside the town boundary and considering you reject a similar planning application in Rock Road Washington on the grounds that it did not comply with planning policy and infill was not allowed I am rather surprised that this has not been noted and used to reject the application.

Is this type of issue dealt with as a matter of policy when the final decision is made rather than now?

Please let me know.

Kind regards
