ENLARGEMENT OF REAR TERRACE

My home, Minstrels, and Woodlands were built by Berkeley Homes,
a respected local builder. They are side by side but with Woodlands further back to avoid overlooking, noise, etc. and provide privacy for both homes.
It works very well.

I OPPOSE THIS PLAN I would be losing important advantages and have to put up with workmen passing bedrooms. The paths from front to the back of our homes are narrow. There would also be noise from laying the terrace.

ERECTION OF SINGLE STOREY REAR EXTENSION

I OPPOSE THIS PLAN

As already pointed out above, any work at the back of the house would create problems for me, not only from workmen but also their moving materials for the job. The raised roof level of the extension and modern windows are not in keeping with our homes.
