Planning Application Statement

James Wells Architects as the agent is submitting this application on behalf of the client, Mr. Eric Mariani, in response to Horsham District Council's letter REF: EN/24/0199 on the 21st of June 2024. It is acknowledged with regret that the client was unaware that the extension to the existing store/garden machinery area required permission. The aim of this application is to ensure compliance with all relevant regulations and to proceed with the project in a manner that meets all necessary standards.

The proposal seeks to extend the existing triple garage building as outlined in planning application DC/21/0187. The new extension will match the length of the existing store and will be constructed over the existing slab, featuring a lower ridge level. No excavation will be required for this extension, and all materials used will match those of the existing structure.

The extended store shed is to be used exclusively for storage of garden equipment and no par of this building, existing or proposed is intended for habitable use.

Existing Extension
