

Hi,

Thank you. I have attached photos supporting my previous emails which highlight the inability and absurdity of Carter Drive being a viable option as a through road. It is unsafe, risky and dangerous.

I am happy for these photos to be public evidence to support my objection.

Hi,

Further to my recent email about the use of Carter drive as a through road to the new development in Broadbridge Heath, it happens to be bin day today and the chaos on the road is ridiculous.

Attached is a video of the tree surgeons and all their vehicles as well as the bin lorry trying to get through to service our weekly bin pick up. This would be the exact road with all of its bottle necks, lack of pavements and single lane access as well as parked residential cars, that is being considered as a through road for a new estate. It would be inconsiderate and outrageous to use this road, as exemplified in both of my attached videos in both emails. I'm honestly in disbelief Carter drive is even being considered as a viable and serious possibility.

Regards, a very concerned neighbour
