SUMMARY OF COMMENTS & RECOMMENDATION: Although the application area is well over the 0.5ha area that would normally require the results of a search of the West Sussex Historic Environment Record to be provided, the proposals either do not involve extensive deep ground disturbance or are within areas that will have been disturbed by existing development and so we have no archaeological concerns in this case	

MAIN COMMENTS:

Although the application area is well over the 0.5ha area that would normally require the results of a search of the West Sussex Historic Environment Record to be provided, the proposals either do not involve extensive deep ground disturbance or are within areas that will have been disturbed by existing development and so as it is very unlikely that significant archaeology will be disturbed I have no archaeological concerns in this case
