Comments Details

Commenter Type:	Neighbour
Stance:	Customer made comments neither objecting to or supporting the Planning Application
Reasons for comment:	- Privacy Light and Noise
Comments:	The proposed plans don't show where the compressor will be housed. Given it's current location, it would be assumed on the same wall of the building within close proximity to the fence and boundary. The compressor is already quite loud when in use in it's current position. Please can the compressor be housed elsewhere away from the residential area to reduce noise?

Access and use - will this be restricted to standard working hours to avoid disruption and nuisance to neighbours?

Kind regards
