- Loxwood Stream
- Mole upstream of Horley
- North River
- Ouse from Slaugham to Ardingly Reservoir
- Stor
- Western Rother
- Woodmill Stream

NOTES

1: This map shows the WFD river waterbody catchments. Catchments are defined as an area of land from which all surface run-off flows through a series of streams, rivers and, possibly, lakes to a particular point in the watercourse such as a river confluence. The WFD Catchments are provided on the Defra Data Services website (<https://environment.data.gov.uk>)
