| Comments: | This application should also be linked to DC/25/1963 as it is on the same site so my objections also apply to that application. I own the paddocks on land that faces the access track to the proposed site. The lanes around the site are all single track with no footpaths and are constantly used by horse riders, horse carriages, dog walkers and cyclists The Mount is the main access |

route to bridleways at either end of the lane hence the regular use by horse riders. The whole area is very rural and made up of numerous stables, farms and wildlife. Consideration should also be given to the fact if allowed the construction site traffic would cause damage to the existing lanes/soft verges damage to trees and in particular the lanes are so narrow that hazards will arise as there are insufficient passing areas for vehicles. The increase in heavy traffic will make it extremely dangerous to the current user's especially horse riders. The proposed site is an overdevelopment of a lovely rural setting and contravenes the Neighbourhood Plan, there is no requirement for additional houses to be built. I notice that on the planning application there is no mention of how sewage treatment will be dealt with and also drainage the area is prone to flooding and surely with additional houses this will just add to the flooding issues. I therefore strongly object to this application.

Kind regards
